(1) In his letter dated 17th January 1908, the Inspector General of Prisons recommended that the rules contained in the Madras Government order No. 1796 dated 18th October 1907 regarding the infliction of flogging as a judicial punishment might be adopted in Mysore. The opinion of the Chief Court in the matter having been invited, the Registrar of the Chief Court has replied that the Chief Judge considers that the Madras rules are incomplete and that it would be preferable to adopt the Central Provinces Rules, with a slight modification.

(2) The question has been considered in Council and the Council recommends that the draft rules appended to the accompanying Council Resolution may be adopted and issued under section 392 of the Criminal Procedure Code. These rules mostly follow the Central Provinces Rules with slight modifications among which may be mentioned the omission of the words "in private" from the first rule. In inflicting

(12)

whipping as a judicial punishment, a little publicity is often desirable, and was adopted by eminent and successful educationists like the late Mr. E.B. Powell and W.A. Porter.

(8.) The draft rules proposed by the Council may be approved.

Sir,

Adverting to your letter No.J.2327-Pris.51 of 07-2 dated 3rd February last asking to be furnished with the opinion of the Chief Court as to whether it would be desirable to adopt the rules re the infliction of flogging as a judicial punishment, contained in the Madras Government Order No.1796 Judl. dated 15th October 1907, in lieu of the rules now in force in Mysore, I am directed to state that the Chief Judge considers that the Madras Rules are incomplete and that it would be preferable to adopt the Central Provinces Rules, a copy of which is appended. The other Judges have no objection to this.

It will be seen that the Central Provinces Rules 1 & 2 correspond with the Madras Rules 1 & 2, while the C.P.Rules 3,4 & 5 correspond to the Madras Rule 3, but are much fuller. In the case of juvenile whippings, considerable latitude is given. The C.P.Rule 6 corresponds with Madras Rule 4. The Madras rule 5 is new but it seems doubtful whether the discretion given to the Magistrates by section 392(2) of the Code can be legally curtail-ed by the rules, and as it is unnecessary, it may be omitted.

I am to add that a slight modification may, perhaps with advantage, be made in the Central Provinces rule 3 by omitting the words "and a leather apron fastened round his waist" and by adding the words "or secured otherwise whenever a triangle is not available" after the words 'on a triangle'. This would make

the

the rule approximate to the terms of the Dewan's Notification w35 dated 16th May 1382 now in force.

Central Provinces Rules.

Rules under section 392 Cr. Pro: Code.

(1). All Judicial whippings shall be inflicted in private either at a jail or in an enclosure near the court-house.

(2). Whenever it is possible to secure the attendance of a medical officer, such an officer shall be present when a whipping is inflicted.

(3). In the case of a person of or over 16 years of age, whipping shall be inflicted on the posterior, the prisoner being tied on a triangle or secured otherwise whenever a triangle is not available and a leather apron fastened round his waist when used. The triangle shall be boarded on the side next the offender so as to preclude the possibility of the rattan curling round and touching the front of the prisoner's person.

(4). In the case of a person under 16 years of age the whi-ping shall be inflicted on the posterior; or, in the case of a boy under the age of 12, on the hands at the discretion of the Magistrate and the prisoner shall be held, but not tied, on a triangle, or in any other convenient way as the Magistrate or other officer present may think fit.

(5). When the whipping is inflicted on the posterior, a thin cloth, soaked in some anteseptic solution, shall invariably be adjusted over the prisoner's buttocks in such a manner that it may remain in position throughout the operation.

(6). The rattan employed shall never exceed the legal minimum of half an inch in diameter in the case of persons over 16 years of age (section 392(i) of the Criminal Procedure Code); and in the case juvenile offenders a still lighter cane shall be employed .

NOTE:- In his letter No.1103 dated the 24th February, to all Civil Surgeons, the Inspector-General of Civil Hospitals has prescribed a solution of carbolic acid in water of the strength of one part of carbolic acid to forty parts of solution as the anteseptic to be used in whippings.

NOTIFICATION.

No. J. 1010—*Pris.* 51-07-5, *dated 29th September* 1909.

In exercise of the power conferred by Section 392 of the Code of Criminal Procedure, the Government of His Highness the Maharaja of Mysore are pleased to lay down the following rules for carrying out sentences of whipping referred to therein, in supersession of the existing rules on the subject:—

1. All judicial whippings shall be inflicted at a Jail or near the Court-house.

2. Whenever it is possible to secure the attendance of a Medical Officer, such an officer shall be present when a whipping is inflicted.

3. The rattan employed shall not exceed the legal minimum of half an inch in diameter in the case of persons over sixteen years of age; and in the case of juvenile offenders, a still lighter cane shall be employed.

4. In the case of a person of or over sixteen years of age, whipping shall be inflicted on the posterior, the prisoner being tied on a triangle or secured otherwise whenever a triangle is not available. The triangle when used shall be boarded on the side next the offender.

5. In the case of a person under sixteen years of age, the whipping shall be inflicted on the posterior, or, in the case of a boy under the age of twelve, on the hands at the discretion of a Magistrate; and the prisoner shall be held, but not tied, on a triangle, or in any other convenient way as the Magistrate or other officer present may think fit.

6. When the whipping is inflicted on the posterior, a thin cloth, soaked in some antiseptic solution, shall invariably be adjusted over the prisoner's buttocks in such a manner that it may remain in position throughout the operation. This antiseptic may be either a solution of perchloride of mercury of the strength of 1 in 2,000 (one in two thousand) or a carbolic lotion of the strength of 1 in 40 (one in
